## Kerjaya Prospek Group Bhd

Kerjaya Prospek Group Bhd is showing signs of sustained bullish momentum, supported by strong technical indicators and trading volumes, according to RHB Investment Bank Bhd (RHB Research).

The research house said the counter recently staged a bullish breakout above the RM2.43 resistance, signalling renewed buying interest and potential for further gains.

"Should momentum continue, the stock could advance towards RM2.55 and subsequently RM2.65," RHB Research said in its latest technical note, adding that a slip below RM2.33 would negate the positive outlook.
