KUALA LUMPUR, Nov 7 — Bursa Malaysia ended the week almost flat but managed to outperform most regional peers, which retreated in tandem with the technology stocks sell-off on Wall Street.

At 5pm, the FTSE Bursa Malaysia KLCI (FBM KLCI) inched up 0.19 of-a-point, or 0.01 per cent, to 1,619.13 from Thursday's close of 1,618.94.

The benchmark index opened 1.31 points lower at 1,617.63, and moved within a narrow range between 1,616.50 and 1,621.19 throughout the trading session.

However, the broader market was negative, with 639 losers beating 402 gainers, while 618 counters were unchanged, 1,002 untraded, and 11 suspended.

Turnover fell to 3.53 billion units worth RM2.35 billion compared with 3.96 billion units worth RM2.52 billion on Thursday.

IPPEFA Sdn Bhd director of investment strategy and country economist Mohd Sedek Jantan said Malaysia's relatively lower exposure to technology counters helped cushion the FBM KLCI from broader regional weakness.

He said consumer products and services counters led the gains, supported by Bank Negara Malaysia's decision to maintain the overnight policy rate at 2.75 per cent, with banking counters also continuing a steady uptrend reflecting investor confidence in stable domestic monetary conditions.

“While global market volatility has generally increased, the FBM KLCI's volatility remains relatively contained. Volatility remains elevated heading into the United States jobs report, as traders stay cautious after Thursday's sell-off in technology and risk assets,” he told Bernama.

Mohd Sedek also said market sentiment remains defensive as a stronger-than-expected US payroll print could dampen interest rate cut expectations and extend volatility, while a softer reading may trigger relief across equities and bonds.

Among heavyweights, Maybank dipped one sen to RM9.91, while Public Bank gained one sen to RM4.27, CIMB Group added three sen to RM7.53, Tenaga Nasional perked up two sen to RM13.22, and IHH Healthcare was six sen higher at RM8.28.
