MSC: Full smelting operations at Pulau Indah plant to start soon

KUALA LUMPUR: Tin miner and metal producer, Malaysia Smelting Corporation Bhdis (MSC) relocation to its new smelting facility in Pulau Indah, Port Klang is progressing well and full smelting operations are expected to commence in the near term.

Group chief executive officer Datuk Dr Patrick Yong said the company's move to the new plant was necessary to establish a solid foundation for growth. as it was facing an increasingly challenging operating landscape, including uncertain macroeconomic conditions and wolatile tin price movements. The technology upgrade will significantly enhance the group's extractive yields, in a more cost-efficient and anner. The new plant uses natural gas as fuel and follows a more ontinuous smelting process, and in a statement vesterday. The technology upgrade will significantly enhance the group's extractive yields, in a more cost-efficient and and the provious mental processor of the

company's plant in Butterworth will still be in service to ensure problem-free production, he added.

added.

"Our priority is peace of mind for our customers at the expense of cost duplication, until smoot operations are achieved."

The Pulau Indah plant will employ cutting edge top submerged lance (TSL) technology to reduce cost and over-reliance on intensive labour, MSC said, adding the overall process efficiency will also be achieved with the TSL single-stage smelting compared

to the dated reverbatory furnaces currently employed in Butterworth.

It will be utilising renewable energy with its installed rooftop solar panels and will be tapping waste heat from the furnaces, recycling energy from operating thermal wastage, in line with the group's aim to become a more sustainable tin player.
Furthermore, the new set-up at the Pulau Indah plant enables ascale-up inproduction capacity by 50 per cent from 40,000 tonnes per year currently.

"As we commence operations

company as a leading integrated tin player, he said.

The impending move to Pulau Indah will also involve an internal restructuring exercise affecting some 550 employees at the Butterworth smelter.

While MSC provides employees the opportunity to relocate from Butterworth to Pulau Indah and upskill their capabilities to operate more advanced technologies, there will be a reduction in manpower as the new modern plant requires less workers.
