CONSIDERATION OF THE AUDITED FINANCIAL STATEMENTS OF THE COMPANY FOR THE FINANCIAL YEAR ENDED 31 JANUARY 2018 TOGETHER WITH THE DIRECTORS' AND AUDITORS' REPORTS

The Audited Financial Statements of the Company for the financial year ended 31 January 2018 together with the Directors' and Auditors' Reports were tabled for discussion. As formal approval by the shareholders was not required, the matter was not put forward for voting.

The Board and Management addressed several questions from shareholders and proxies, and that the key matters raised were set out below:

(i) The business prospect for the next 5 years amid the challenging economic and political environment in Malaysia

SEB is a global integrated oil and gas service and solutions provider with operations in more than 20 countries. During the downturn, the Group capitalised on its opportunities that augur well with its capabilities and strategic aims. The Group strengthened its presence in existing markets and entered into new markets.

For the first six months of this financial year, SEB had already won RM4.5 billion worth of contracts compared to the value achieved in the same corresponding period of the previous year between February to June 2017. The Management believes that the market is turning and the Group's performance will improve.

The Group is also looking into monetising its assets to pare down part of its debts which would in turn reduce interest costs. The Group has identified several strategic initiatives, including the potential listing of one of its businesses and a possible capital raising exercise.

(ii) Why has the share price of SEB dropped so much?

The Group had not performed well from a financial standpoint. The Group had invested from an operational standpoint to be well positioned to excel in the next few years and to entrench the Group as a viable global competitor.

Investors that have a short-term view on the Group and sold off their shares had caused the drop in share price.

(iii) Any further significant impairments expected to be made?

From an operational view point, the Management does not foresee any material impairment unless there is further prolonged downturn of the industry or major shift in technology that affects the Group's business.

(iv) Independence of the Board Remuneration Committee (“BRC”)

The Independent Directors of the Company are experienced in the corporate world and have expertise in the oil and gas industry. Where necessary, the Board will ask the PGCEO to leave the meeting room when sensitive matters are discussed to ensure objectivity.

(v) The bonus paid to PGCEO was on the high side of RM55 million. Is “profit” one of the KPIs for the PGCEO? What are the KPIs for the PGCEO?

Apart from financials, PGCEO’s KPIs included operations and safety, stakeholders’ relationship management, people development and strategic initiatives, as set out on page 93 of the Annual Report 2018.

To determine his remuneration, one of the important elements that the Board took into consideration was his contribution in the refinancing exercise of the existing RM16 billion borrowings. The PGCEO had given several personal undertakings as requested by the bankers. This included that the PGCEO cannot dispose of his shareholdings in SEB to less than 10% and to remain committed to the company by being part of the Management.

The Board had recognised that while the PGCEO is not a controlling shareholder of the Company with about 17% equity interest, he had made a personal commitment for the benefit of the Company by entering into the share covenant.

(vi) Clarification on the treatment of Islamic facilities and interest payment in Audited Financial Statements

Borrowings were disclosed on page 188 of the Annual Report 2018. Most of the financing were under Islamic facilities and sukuk secured from Islamic Institutions. However, SEB Group also has conventional borrowing from foreign banks. Management agreed that the terms used for Islamic facilities should be “financing” and “profit rate”, but from disclosure point of view, it was currently all grouped under “Borrowings” and “Interests” together with conventional loans.

EY explained that under the accounting standards, there was no difference on the accounting treatment for Islamic financing and conventional interest. He further confirmed that the existing accounting presentation is in compliance with the requirements of the accounting standards.
