Three wins added to its order book-reliability in meeting its guidance

Despite not yet enjoying the awards phase for new large infrastructure jobs, SunCon's job wins have already managed to exceed its 2019 order book guidance of RM1.5bn, impressively by the half-year mark. The company announced three awards to the tune RM497m, a blend of external and internal ones, lifting its total this year to RM1.54bn, equalling that of 2018 (RM1.55bn). Investors should appreciate the consistency of it delivering on its order-book guidance, and more so now the prospect of an upside surprise this year (from local and overseas jobs). As the jobs clinched are within expectation (2019: RM2bn), we make no changes to our forecast or BUY recommendation.

Most notably the project from Petronas—repeat work from the group

Most noteworthy of the three projects secured is the RM310m construction of Petronas' Leadership Center in Bangi, Selangor. Linked by a curved central pedestrian spine, this project encompasses a four-storey institutional building and other facilities. A 20-month work process, this award builds to the owner's specifications (versus design and build jobs which typically come in at higher end of its 5%-8% pre-tax margin guidance). SunCon has a track record of performing work for the Petronas group, having being involved in projects for the latter's subsidiary, KLCC Holdings (Figure 4). Separately, SunCon also announced it secured a 35 months of electrical work for electrical systems for the Oxley mixed development (RM68m).

Recurring work bagged from parent's South Quay project

Concurrently, SunCon announced more awards in Sunway Berhad's (N-R) South Quay property development, part of a four-phase project, for earth works and piling valued at RM119m. Its total internal projects for 2019 thus is lifted to RM219m, or 14% of its wins to date. Historically (past five years), it enjoys an annual average RM0.6bn buffer from internal work (or 25% of replenishment). Looking ahead, internal job prospects include its parent's Penang projects, aside from hospital construction.

Positive surprise may stem from projects abroad

We estimate its outstanding order book at RM5.7 bn. It is yet to be known if SunCon will revise its 2019 target, although it is optimistic on overseas jobs, possibly from India (it worked in seven highways earlier for an aggregate RM1.2bn) or Myanmar. Local opportunities are the Klang Valley Double Track project, the East Coast Rail Link and the MRT3, likely in the future. Excluding net cash per share of 31 sen (Mar 19), SunCon trades at a 12.3x PE (20CL), below the Bursa Construction Index of 13.1x (we accord a 15 sen per share benefit in our target derived at a 15.4x 20CL PE). A near-term risk is still-slow LRT3 earnings, although this will catch up from 3Q19.

SunCon is trading close to its average forward PE since listing

Valuation details

We value SunCon using the price-earnings multiple approach. Its target price is derived from 15.4x 20CL earnings, which is at one standard deviation above 10-year mean PE for the KLCON index. We accord an above-sector average PE given its flow of internal jobs and strong balance sheet.

Investment risks

The investment risks for SunCon mainly stem from construction risk. Specific risks to our estimates would be lower-than-expected margins (below 5-8%) or the amount of projects secured falls below our expectation, either due to an inability to secure projects or caused by a delay on project roll-out. The increase in steel prices beyond anticipated will also creep into margins as SunCon hedges steel needs for a future six-month period. On the pre-cast segment, risks to our earnings will be the timing of a margin recovery currently in doldrums due to competition. SunCon is also susceptible to risk facing the construction industry in general, which includes the risk of disputes and ensuing lengthy negotiations, which are not uncommon, not to mention the fluctuations in raw materials and availability of labour.

For relative performance, we benchmark the 12-month total forecast return (including dividends) for the stock against the 12-month forecast return (including dividends) for the market on which the stock trades.

We define as "Double Baggers" stocks we expect to yield 100% or more (including dividends) within three years at the time the stocks are introduced to our "Double Bagger" list. "High Conviction" Ideas are not necessarily stocks with the most upside/downside, but those where the Research Head/Strategist believes there is the highest likelihood of positive/negative returns.
