18. COMMENTARY ON PROSPECTS

Upstream O&G Services Segment

The Gaza conflict has escalated tensions to a level not witnessed since the Russia-Ukraine war in April 2022. The situation likely involves political, social, and humanitarian dimensions, impacting not only the immediate area but also triggering ripple effects on the international stage. Simultaneous with the Gaza conflict, ongoing trade wars exacerbate global economic challenges. The tensions generated by trade disputes can have far-reaching consequences, affecting industries, supply chains, and market dynamics. Combined with soaring interest rates and tighter bank credit, businesses worldwide face a challenging environment, especially those grappling with sluggish manufacturing and trade.

The supply cuts from OPEC+ countries will result in world oil supply falling further and erode oil inventories for the rest of this year. The projected rise in oil demand for the next year provides a glimmer of optimism amid the challenges. However, this optimism remains vulnerable to the heightened economic and geopolitical risks. The delicate balance between supply and demand in the oil market could be influenced by geopolitical developments and economic uncertainties, potentially impacting energy security and global economic stability.

The PETRONAS Activity Outlook 2023 – 2025 remains positive for upstream activities such as well services given the oil price recovery and the relaxation of pandemic SOP is a major boost to local companies as PETRONAS look to increase output to capitalise on current oil prices. Few major contracts awarded by PETRONAS to Uzma Group with an estimated contract value in excess of RM 1.0 billion, shown a positive outlook from PETRONAS activity in 2023. In addition, our oilfield chemical solutions which currently servicing three out of the total four deepwater projects in Malaysia proved its ability in producing reliable chemical to be used in deepwater upstream projects.

New Energy Segment

We accelerated our efforts to pursue opportunities to diversify and balance our business portfolio beyond the O&G sector, venturing into new key growth areas such as New Energy and, Digitalisation & Technology.

Our renewable energy business is steadily growing. On 8 August 2022, the Energy Commission extended the Power Purchase Agreement ("PPA") tenure from 21 years to 25 years for our 50 megawatt ("MW") Large Scale Solar 4 ("LSS4"). Our 50MW LSS4 project has progressed positively with the development order obtains from Majlis Perbandaran Sungai Petani (MPSPK) on 28 May 2022. Subsequently, the project has received Earthwork Plan Approval from MPSPK on 12 June 2023. The project has achieved Financial Close in July 2023. The project has achieved significant progress where solar panel installation works and construction of interconnection facilities has started. In addition, we also secured several Net Energy Metering ("NEM") contracts; both as EPCC and PPA holder.

On 27 July 2023 Malaysia launched its National Energy Transition Roadmap (NETR) with a strong focus on transforming the economy and creating potential business opportunities in the energy sector. Phase 1 of the NETR unveiled 10 flagship catalyst initiatives that aim to attract investments and generate job opportunities while reducing CO2 emissions for over 10 million tons annually. Overall, the NETR advances a range of investment opportunities across the renewable energy sector and related industries in Malaysia. On 7th August 2023, Consortium of Angelaxy Power Sdn. Bhd. And Uzma Environergy Sdn. Bhd has received letter of notification of Application Status for Corporate Green Power Program ("CGPP") from ST. The letter indicated the submission has met application criteria and requires the consortium to proceed with the registration under the New Enhanced Dispatch Arrangement (NEDA) Programme. Under the CGPP, the Consortium shall develop, finance, construct, operate and maintain 12.16MW in Bahau, Negeri Sembilan. Phase 2 of the NETR will be launched in the second half of 2023. While gaining track on Business as usual investment model in LSS and NEM projects, we are also aligning ourselves to support the government aspiration toward Energy Transition and 2050 Net-zero target by exploring opportunities in other programmes such as CGPP and Third Party Access. At the moment, the government has yet to publish a framework for the Third Party Access. However, market research on the subject matter is actively done to ensure readiness to undertake the programme upon rollout by the government.
